Electrical Engineering and Computer Science (EECS) spans a spectrum of topics from (i) materials, devices, circuits, and processors through (ii) control, signal processing, and systems analysis to (iii) software, computation, computer systems, and networking.

Department of Electrical Engineering and Computer Science

Rail terminology is a form of technical terminology. The difference between the American term railroad and the international term railway (used by the International Union of Railways and English-speaking countries outside the United States) is the most significant difference in rail terminology. There are also others, due to the parallel development of rail transport systems in different parts ...

Glossary of rail transport terms - Wikipedia

Machines, an international, peer-reviewed Open Access journal. A sample of healthy wind turbines from the same wind farm with identical sizes and designs was investigated to determine the average vibrational signatures of the drive train components during normal operation.

Machines | An Open Access Journal from MDPI

Human history in California began when indigenous Americans first arrived some 13,000–15,000 years ago. Coastal exploration by Europeans began in the 16th century, and settlement by Europeans along the coast and in the inland valleys began in the 18th century. California was ceded to the United States under the terms of the 1848 Treaty of Guadalupe Hidalgo following the defeat of Mexico in ...

History of California before 1900 - Wikipedia

Central Pacific Railroad construction in the 1860's. Stereoviews, engravings, maps, and documents are treasures of western Americana that illustrate the history of the first transcontinental railroad, built from Sacramento, California over the Sierra Nevada mountains, to the end of track at the Golden Spike Ceremony at Promontory, Utah where the rails were joined on May 10, 1869 with the Union ...
