A subwoofer (or sub) is a woofer, or a complete loudspeaker, which is dedicated to the reproduction of low-pitched audio frequencies known as bass and sub-bass. The typical frequency range for a subwoofer is about 20–200 Hz for consumer products, below 100 Hz for professional live sound, and below 80 Hz in THX-approved systems. Subwoofers are intended to augment the low frequency range of ...

The availability heuristic is a mental shortcut that relies on immediate examples that come to a given person's mind when evaluating a specific topic, concept, method or decision. The availability heuristic operates on the notion that if something can be recalled, it must be important, or at least more important than alternative solutions which are not as readily recalled.

These '10,000 most common words' are from a very large compilation of online texts of ~5,000,000 words. The list is mostly from written texts (Hebrew news sites, Hebrew wikipedia, science, sports, international, some literature, etc.) and not oral transcripts, therefore the frequency order is certainly a little different than what it would be for a list derived purely from spoken text.
