

fresh water in international pdf

Water resources are natural resources of water that are potentially useful. Uses of water include agricultural, industrial, household, recreational and environmental activities. All living things require water to grow and reproduce. 97% of the water on the Earth is salt water and only three percent is fresh water; slightly over two thirds of this is frozen in glaciers and polar ice caps.

Water resources - Wikipedia

Next steps for fresh water 5 contributing to the work, and that any funding proposal is backed by robust scientific support and advice. Improving the management of our fresh water is a long-term task.
