Sterol esters are a heterogeneous group of chemical compounds. They are created when the hydroxyl group of a sterol and a fatty acid undergo an esterification reaction. They can be found in trace amounts in every cell type but are highly enriched in foam cells and are common components of human skin oil.. Plant sterol esters have been shown to reduce the level of low-density lipoprotein (LDL ...

Before we get into the big job of interpreting cholesterol numbers, letâ€™s review what cholesterol actually is. Cholesterol is cholesterol: a waxy steroid of fat that serves as an essential structural component of cellular membranes and in the production of steroid hormones, vitamin D, and bile acids. Contrary to what the terminology indicates, thereâ€™s actually only one â€œtypeâ€• of ...
