In response, this report proposes a list of components or "coordinates" designed to help describe and place activity within the landscape and to facilitate discussions

### **Mapping the sustainability reporting landscape**

A map is a symbolic depiction emphasizing relationships between elements of some space, such as objects, regions, or themes.. Many maps are static, fixed to paper or some other durable medium, while others are dynamic or interactive. Although most commonly used to depict geography, maps may represent any space, real or fictional, without regard to context or scale, such as in brain mapping ...

Geopolitics (from Greek *gē* "earth, land" and *politiká*,—"politics") is the study of the effects of geography (human and physical) on politics and international relations. While geopolitics usually refers to countries and relations between them, it may also focus on two other kinds of states: de facto independent states with limited international recognition and ...
