In software engineering, a software development process is the process of dividing software development work into distinct phases to improve design, product management, and project management. It is also known as a software development life cycle. The methodology may include the pre-definition of specific deliverables and artifacts that are created and completed by a project team to develop or ...

History. Ever since the 1960s, all sorts of schemes for nonlinear processing of images have been discussed and used in particular communities. An example originally popular in the earth and environmental sciences is mathematical morphology, based on "dilation" of data consisting of 0's and 1's with a "structuring element"  $f$  according to  $\text{Sign}[\text{ListConvolve}[f, \text{data}, 1, 0]]$  (as well as the dual ...
