Sustainable living describes a lifestyle that attempts to reduce an individual's or society's use of the Earth's natural resources, and one's personal resources. Its practitioners often attempt to reduce their carbon footprint by altering their methods of transportation, energy consumption, and/or diet. Its proponents aim to conduct their lives in ways that are consistent with sustainability ...

For more practical detail the behavior you wish to continue indefinitely must be defined. For example: Environmental sustainability is the ability to maintain rates of renewable resource harvest, pollution creation, and non-renewable resource depletion that can be continued indefinitely.. Economic sustainability is the ability to support a defined level of economic production indefinitely.
