The most straightforward type of air-free technique is the use of a glovebox. A glove bag uses the same idea, but is usually a poorer substitute because it is more difficult to purge, and less well sealed. Inventive ways of accessing items beyond the reach of the gloves exist, such as the use of tongs and strings.

Techniques in Home Winemaking is a resource for home winemakers looking for information or help on making great wines, and to share that knowledge with fellow winemakers. This resource is based and builds on my book by the same title. Much of my experience is derived from extensive literature search as well as from my experience both as a home and a commercial winemaker.

Humans have 60â€“70 2OGâ€“dependent oxygenases, of which some are important therapeutic targets. A priority in the development of oxygenase inhibitors is to identify scaffolds selective for a particular enzyme,

made challenging by the highly conserved oxygenase active sites.
