

the accounting cycle service pdf

Accounting or accountancy is the measurement, processing, and communication of financial information about economic entities such as businesses and corporations. The modern field was established by the Italian mathematician Luca Pacioli in 1494. Accounting, which has been called the "language of business", measures the results of an organization's economic activities and conveys this ...

Accounting - Wikipedia

Fund accounting is an accounting system for recording resources whose use has been limited by the donor, grant authority, governing agency, or other individuals or organisations or by law. It emphasizes accountability rather than profitability, and is used by Nonprofit organizations and by governments. In this method, a fund consists of a self-balancing set of accounts and each are reported as ...
